

Cleaner Spirit (CLS)

A revolutionary alternative to white spirit for all purposes, other than thinning paint. Low VOC, 100% biodegradable, non-toxic and non flammable it cleans and condition brushes and rollers and cleans up paint spills from all hard surfaces and even most textiles and carpets.

Product Features

 A much safer replacement for white spirit. 100% Biodegradable formula.

NOT SUITABLE FOR THINNING PAINT.

 Non-flammable, low odour & low VOC , making it suitable for use inside and out.

 A safe and effective cleaner for brushes, rollers and other painting tools.

 Contains a special conditioning agent that leaves brushes soft and supple

 Removes water based and most oil based paints with ease. Much better than white spirit on enamels for models

 Efficiently removes paint spills from all hard surfaces, most carpets and textiles.

Suitable Substrates

Magic Bullet's '**Cleaner Spirit**' (CLS) is a versatile, safe and effective cleaner for all painting tools.

It can also be used as a stand-alone cleaning product or as a superb preparation tool prior to painting surfaces.

Not suitable for heavy deposits of grease, grime or surface contamination (Use Magic Bullet's Heavy Duty Cleaner Degreaser).

It is widely used to clean paint spills from hard surfaces like laminate floors, worktops, tiles and glass as well as most textiles and carpets. It will also remove fresh spills from existing dry painted surfaces without damage.

Please refer to the relevant Product Health and Safety Data Sheet prior to any use.

Application

It also makes an excellent degreasing fluid for removing oil and grease from tools. In tests, users stated there was no difference in cleaning qualities between White Spirit and **Cleaner Spirit**, and, when removing paint from textiles, they thought **Cleaner Spirit** performed better.

Classified as Low in Volatile Organic Compounds, with a solvent content of below 4%, **Cleaner Spirit** is safer for the environment, especially when compared with traditional solvents that are regarded as Very High VOC's with 100% solvent content. **Cleaner Spirit** carries no Dangerous for the Environment classification.

Cleaner Spirit is virtually odourless. Normal paint solvents usually have a very strong hydrocarbon smell that most users dislike, especially when using in confined areas. This means when painting internally, there is no requirement to open windows and doors as when using White Spirit, etc.

Cleaner Spirit is classified as non-toxic, non-flammable and non-corrosive, resulting in a product that is much safer to use meaning that it carries none of the label warnings of other paint solvents. There is no restriction on the sale of **Cleaner Spirit** and none of the usual storage precautions associated with White Spirit, etc.

Trial application

For any other application not referred to in this information sheet, we strongly recommend you carry out a small discrete hidden sample application to test the suitability of our Cleaner Spirit for your particular use.
